Dear Colleagues,

Greetings from the Faculty of Medicine of Strasbourg, I hope you are well.

In this email I would like to draw your attention to the recent changes in our study program and academic calendar that will take place from the academic year 2022-23.

Could you please advise your students planning an Erasmus mobility in Strasbourg that:

- for the 4th and 5th year students, the academic year at our Faculty will now start in September (and not in October)
- gynecology, psychiatry and pediatrics courses will be from now on taught during one semester only
- some courses have been removed from our curriculum ("Blood tissue and immune system", "Humanities and social sciences", "Basic molecular, cellular and tissue mechanisms of drug action")
- one course have been added ("Sensory nervous system")
- there will be only one exam session/semester, with resit exams late June/early July

The new curriculum and a tentative academic calendar for 2022-23 are available on our website : <http://med.unistra.fr/fre/International/Echanges-internationaux-Accueil-Erasmus>

Should you need any further information, please feel free to contact me.

Best regards,

--
