Dear Anna,

Due to the current pandemic situation and its repercussions, taking into account the specificities of medical education, the Faculty of Medicine of the University of Universitat Autònoma de Barcelona has decided to **cancel all the incoming mobilities during the first semester of the next academic year.**

We deeply regret having to make this difficult decision, but it has made taking into account the uncertain situation we are going through and always with the concern on providing the students the best training.

We hope to be able to accept all your nominated students for the 2nd Semester. For now, we will kindly appreciate if you can confirm if your FIRENZE UNIVERSITY full term nominated students would be interested on coming for the 2nd semester. Once the first semester will start, and we will be able to study the situation again and will have the final course offering set, we will get back to you in order to inform you about the register requirements and will open again a form to let students ask for the available subjects.

Thus, we will contact you and the student again by the start of the new course. Students who have already registered for courses will be contacted again as well.

Regarding the **academic dates**, the current academic calendar states that the second term will take place **from February 15th until July 2nd, 2021** (students must arrive earlier in order to arrange the course registration- check section "[5. Upon Arrival](#)").

The **rotations calendar** for the second term, which works independently from the academic one, will remain pending of confirmation.

By last, we remind you that updated information (calendars, course offering, etc.) will be posted in our incoming website: <https://www.uab.cat/web/mobilitat-internacional/itineraris/incoming-exchange-students/degree-in-medicine-1345721739908.html>

We deeply regret the inconvenience this decision may cause to you and your students (in copy of this email).

Thank you in advance for your understanding.
